ABOUT ME

I am a versatile software developer with a passion for building innovative web and mobile applications. With a strong background in full-stack development and mobile app development, I have successfully led the development of complex web applications, optimized user interfaces for performance and responsiveness, and implemented scalable architectures using cutting-edge frameworks.
I am always excited to explore new technologies, contribute to impactful projects, and work with dynamic teams that push the boundaries of innovation.

PROGRAMMING LANGUAGE

Java Python C++ Javascript Typescript C# PHP Go Dart

FRONTEND STACK

HTML CSS React Vue Next AlpineJs Bootstrap Tailwindcss Sass Figma

BACKEND STACK

Laravel Livewire NodeJs NestJs Firebase REST Graphql

MOBILE AND DESKTOP APP DEVELOPMENT

Flutter Android-Studio Quasar

PROJECTS

projects done | participated
- Logistics System
- Doctor and Hospital Management system
- Ecommerce Application
- Social media Platform
- Health science College
- Video sharing Application
- Ride Hailing System

DEPLOYMENT AND CONTAINERIZATION

deployment and containerization
- Test driven development(jest cypress phpunit)
- Web server(apache nginx)
- Hosting(vps digitalocean forge envoyer)

- Containerization(docker kubernetes)
- Clound computing(AWS and GCP)

WORK EXPERIENCE

[01/2023 – 30/07/2024]
Pool Technology

- Built integrations for appropriate map services, SMS services and payment systems.
- Coached junior developers and interns.
- Wrote easy-to-understand, structured documentation for the open-source community with easy-to-use tools such as Postman Collections.
- Worked directly with the headquarters located in Nairobi, Kenya using remote development technologies
- Improved product speed and quality by revising and refactoring code written by less experienced developers.
- Orchestrate efficient large-scale software deployments, including testing features and correcting code

[11/2022 – 12/2022]
Snap Tax

- Gather and define customer requirements to develop clear specifications for creating well-organized project plans
- Discuss project progress with customers, collect feedback on different stages and directly address concerns
- Meet with project manager and team members to provide detail project reports and milestone updates
- Worked directly with the lead developers located in New Delhi, India using remote development technologies

[01/2022 – 09/2022]
Madot Technology

- Led the development and architectural design of a complex web application implementing scalable and maintainable backend architecture.
- Actively contributed to the company's engineering culture by sharing knowledge, delivering tech talks during weekly dev-team retrospectives, and organizing internal workshops or training sessions.
- Collaborated with cross-functional teams to design, develop, and deploy app with integrations on various platforms, resulting in a successful launch of the product.
- Taken products from 0 to 1, while leading fellow developers in the team.

[06/2021 – 12/2021]
Botaye Data Science

- Preparing reports on programming project specifications, activities, or status.
- Conferring with project managers to obtain information on limitations or capabilities.
- Directing software programming and documentation development.
- Implemented UI designs for responsive and accessible websites

EDUCATION AND TRAINING

Electrical and Computer engineering
Addis Ababa University

SKILLS

soft skills

- Strong problem solving ability
- adaptability to new technologies
- effective communication skill
- teamwork
