ABOUT ME

Full-stack Software Engineer with 4+ years of experience designing and scaling web and mobile applications. Delivered end-to-end features using React/Vue + Laravel/Node.js/Django that improved performance and supported growing user bases, with strong emphasis on clean architecture and production quality.

EXPERIENCE

21/02/2025 – 29/11/2025

HADDIS ART

- Collaborated with cross-functional teams to design, execute, and deliver scalable enterprise-grade solutions.
- Enhanced maintainability of the administration dashboard through comprehensive code reviews, refactoring, diagnosing and resolving complex database issues
- Architected responsive, accessible, and mobile-first user interfaces to deliver seamless, intuitive digital experiences.
- Proposed improvements to code organization to improve code quality and overall performance.
- Designed and developed a suite of high-performance reporting modules, empowering users with data-driven decision-making tools and real-time metrics.

01/09/2024 – 15/02/2025

BIRITU SAVING & CREDIT COOP

- Designed and maintained well-documented APIs for mobile application services, ensuring seamless integration and scalability.
- Architected and delivered a high-performance administration dashboard for digital savings and cooperative management, streamlining workflows for administrators.
- Developed the cross-platform mobile application for Biritu from scratch using React Native, leading the project through its initial launch phase.
- Mentored interns on software engineering fundamentals, driving excellence in code quality, system design, and API development.

01/2023 – 30/07/2024

POOL TAXI

- Built integrations for appropriate map services, SMS services, and payment gateways.
- Integrated core features like achievements, spin and win lottery system, backup system
- Managed software deployments to vps and cloud platforms, including testing features and correcting code
- Completed several tasks with deadlines, which let me adapt to working under a tight deadline and learn how to divide/prioritize tasks.

01/2022 – 09/2022

MADOT TECHNOLOGY

- Contributed to the development of Logistics Systems and Lideta Health Science College website, with UI improvement and API development.
- Developed and maintained user interfaces using modern frameworks like React.js, Vue.js, Bootstrap and Tailwindcss.
- Designed and implemented backend features, including authentication, authorization and database architecture of application.
- Gathered, documented, and maintained software requirements throughout the project lifecycle.
- Converted design prototypes created in Figma into functional, dynamic web components using React and Tailwindcss.

01/01/2023 – CURRENT

FREELANCE

- Delivered and supported custom web applications and sites for varied clients utilizing adaptable technology stacks.
- Resolved critical bugs and delivered feature enhancements across diverse client applications, ensuring high system stability and client satisfaction.
- Designed and developed custom, responsive portfolio websites that empower clients to professionally showcase their work and personal brands.
- Diagnosed and resolved deployment failures across applications, ensuring reliable and seamless releases.

PROJECTS

Projects Completed and Contributed To

- Video sharing Application
- Ecommerce Application
- Ride Hailing Platform
- Digital Saving System
- Doctor and Hospital Rating system
- Logistics System

FRONTEND AND MOBILE

React / Next.js • Vue / Nuxt • React Native • Flutter • Tailwind CSS • Bootstrap

BACKEND

Laravel • Node.js • Django • MySQL/PostgreSQL/MongoDB

DEVOPS AND CLOUD

Docker • Kubernetes • GitHub Actions • AWS

SYSTEM DESIGN & ARCHITECTURE

Software Architecture • System Design • API Design • Design Patterns • Distributed Systems • Microservices • Scalability • Performance Optimization

EDUCATION AND TRAINING

01/10/2018 – 30/11/2023

BSC DEGREE Addis Ababa University

Field of study Electrical and Computer Engineering
